"Australia Says" Spec

Overview of the site:

This site allows people to comment on news articles from various news sources.

News articles are added to the site via one of two ways

1.   Manually – The site administrator fills out a form with all of the required fields.

Site Users

1.   There are 3 users for the site
1.   Administrators
2.   Commenters
3.   Readers

Administrators

-       Load articles into the site via a basic admin panel.
-       They moderate comments.

Commenters

-       Comment on articles
-       Report comments as "bad"

Readers

-       Report comments as "bad"

Admin Site

- Add Site
  - Site Type
- Add Article
  - By RSS and tick a box to include article in site
  - Manually (fill out a form)

Page details

Administration

Admin to have a log in.

Username: david

Password: testPassword

Add a Site.

Basically we need to group articles by the site they are coming from. For each site we need to store: Site Name, Site Country (Use country list), Site URL, Site Logo, Site type (News, Sport, Celebrity, Technology, Add New - opens a Pop Up or Modal window).

Add an Article.

I would like 2 options for the importing of articles.

First is RSS feed. Need a basic page which will allow Admin to enter the RSS Feed address. When articles are downloaded, the articles are to be listed and have a check box to include the article in the site when ticked.

The second option is to manually add an article, we need to enter / specify: Site Name (Drop down with add new that opens into pop up / modal), Article Name, Article URL, Article type (News, Sport, Celebrity, Technology, Add New - opens a Pop Up or Modal window)., Article Tags

Public Site

Home Page

This page should have the following categories and show the top 10 articles with a more link to view all articles in each category: Most Recent, By Site, Most Commented (within last week)

When a user clicks on an article, they would see: Article Title (which is a link to the full article), article summary, comments. The page functions are: Reply to article, Reply to comment, Report comment.

Article Details / Comments

This page displays the article heading, the article summary, and the first 500 chars of the article.
